

HYF 4006 380KV

- 1 Optimal Mid-Size Prop Performance**
Designed for 13"–15" propellers, delivers up to 2.2 kg of thrust—perfect for stable lift and precise control.
- 2 Versatile Voltage Compatibility**
Supports 3S–6S LiPo (6S recommended) for flexible power system integration across various platforms.
- 3 Lightweight & Efficient Cooling**
Only 78 g in weight with an open-frame design for excellent heat dissipation in continuous operations.

ITEM	SPECIFICATION
KV Value	380 KV (standard model)
Weight	Approx. 78 g
Size (Outer Ø × Height)	Ø42 mm × (height per stator spec)
Rated Voltage (LiPo)	3S–6S (Recommended 6S)
Max Current	Approx. 18–22 A (depends on prop & voltage)
Max Output Power	Approx. 400–500 W
Max Thrust	Approx. 1.8–2.2 kg (with 13"–15" props)
